

CAPSYS® CAPTURE™ is a complete, distributed document capture and automation platform, designed to streamline the process of acquiring documents and information securely and confidently.

CAPSYS CAPTURE is...

- Distributed
- Thin (Browser Client)
- Automated
- Graphical
- Simple
- Affordable

CAPSYS CAPTURE is the only fully functional Thin Client capture application

- 100% True Web
- TWAIN Scanner Support
- Integrated Image Viewer
- Capture Process Workflow
- Full QC Functionality
- Desktop File Import
- Automated File Import
- Database Lookup
- Document Classification
- Image Cleanup
- Barcode Recognition
- Automated Page Separation
- OCR/ICR Verification

CAPSYS® CAPTURE™

Conveniently Capturing Any Document, Anywhere, Anytime.™

WITH CAPSYS CAPTURE YOU CAN EFFECTIVELY AND EFFICIENTLY...

- ▲ Capture documents easily from anywhere in the world where the paperwork originates
- ▲ Capture and index large volumes of documents securely
- ▲ Increase the speed of transaction-oriented business processes
- ▲ Ensure corporate compliance by managing and monitoring incoming documents
- ▲ Eliminate the cost and handling risks associated with shipping paper documents
- ▲ Automate complex capture and indexing tasks eliminating manual data entry expenses and errors
- ▲ Import and process Email and Faxes
- ▲ Easily integrate with third-party and legacy systems
- ▲ Deploy either as Software as a Service ("SaaS") hosted in the convenience of our secure data center or as a traditional "on-premise" purchase
- ▲ Realize low total cost of ownership and significant cost savings

CAPSYS CAPTURE

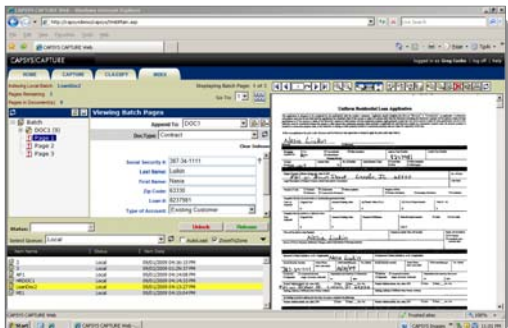

Conveniently Capturing Any Document, Anywhere, Anytime.™

LOW-COST, WEB-BASED DOCUMENT CAPTURE

CAPSYS CAPTURE is the first fully-functional, true enterprise distributed capture system built for the Internet. CAPSYS CAPTURE was designed from the very beginning to be distributed. In late 1999, while other capture companies were focused on thick capture clients and proprietary scanning hardware, we had a vision of capturing documents from anywhere in the world with an easy to deploy web-based capture client. As browser technology matured and internet bandwidth increased, the thin client capture application has emerged as the main capture application. CAPSYS CAPTURE's thin client has all of the production capture features previously only available in traditional, expensive, and difficult to deploy Windows "thick" clients.

THE THIN ADVANTAGE

The CAPSYS CAPTURE Client packs plenty of production capture features into a thin browser-based application that is easily deployed to any desktop in the world with an internet connection and a browser. Documents can be scanned with any TWAIN scanner or imported from the desktop (examples would include Emails, Word and Excel documents, etc.). Getting documents from their source into a repository is a snap. Documents are securely transmitted from the CAPSYS CAPTURE client to the CAPSYS CAPTURE Server over a secure internet connection. CAPSYS CAPTURE truly is Web-Based Capture, Anytime, Anyplace!

DISTRIBUTED CAPTURE

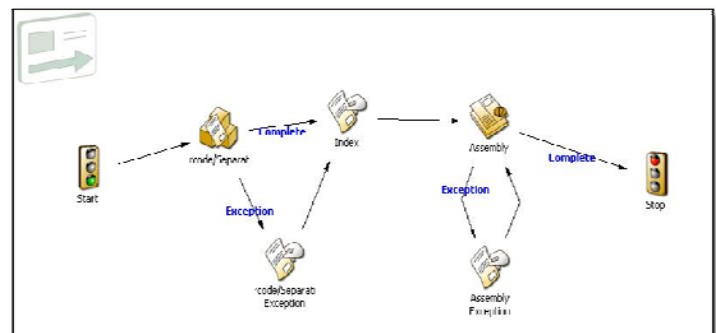

CAPSYS CAPTURE does so much more than just remote scanning and uploading of documents from distributed locations. It allows people in different locations around the world to work together to accomplish sophisticated capture tasks. CAPSYS CAPTURE uses a unique business process engine complete with a visual (graphical) workflow designer and flexible processing queues to allow people to work together across the world like no other capture product can – or does. SCAN in Delhi, INDEX in London, APPROVE in New York, STORE in Chicago! The possibilities are endless with CAPSYS CAPTURE.

CAPSYS CAPTURE DOCUMENT PROCESSING

CAPSYS CAPTURE provides powerful features to allow you to automate your capture process as much as possible. CAPSYS CAPTURE can automatically clean up your documents for more accurate processing and clarity of viewing. CAPSYS CAPTURE offers comprehensive document processing capabilities like barcode recognition, page separation (patch code separation, blank page separation), robust optical character recognition (OCR/ICR), marked sense and forms recognition capabilities. Regardless of which methods you deploy, CAPSYS CAPTURE has the features to automate your capture process so you can acquire documents quickly and efficiently from anywhere around the globe.

CAPSYS CAPTURE VISUAL WORKFLOW

The power behind the CAPSYS CAPTURE system is its unique business process engine. Developed by business process automation experts with years of combined workflow and business process automation experience, CAPSYS CAPTURE addresses document capture automation like no other capture product on the market. The CAPSYS CAPTURE Visual Workflow includes an integrated Visual Process Designer for easily designing capture processes without requiring programming or scripting. The Visual Process Designer allows analysts and administrators to create business processes by simply drawing a map. Powerful and flexible business processing rules are implemented through data-driven wizards and easy to use visual dialogs. CAPSYS CAPTURE also includes enterprise class features for managing large sophisticated capture processes, such as

CAPSYS CAPTURE Features...

- Fully-functional, Web-based Thin Client Document Capture
- Configurable, Graphical Capture Workflow
- Powerful Capture and Indexing Features
- Simple Concurrent Usage Licensing Model (no page or click counts!)
- Simplicity and Ease of Use
- Provided as a SaaS or as an On-premise Purchase

Powerful and flexible business processing rules are implemented through data-driven wizards and easy to use visual dialogs. CAPSYS CAPTURE also includes enterprise class features for managing large sophisticated capture processes, such as

process templates and the ability to import and export processes between test, development and production capture systems. In addition, CAPSYS CAPTURE is integrated with Active Directory Services and LDAP for management of user accounts on a large scale.

EXTENSIBILITY AND ARCHITECTURE

CAPSYS CAPTURE is completely extensible through its CAPSYS CAPTURE Server architecture, allowing third-party developers, end-users and integrators to create fully plug-able processing modules, called Quick Server eXtensions (QSX), for CAPSYS CAPTURE. CAPSYS customers, partners and our own development team use this architecture to develop modules for CAPSYS CAPTURE that are packaged and included as part of the standard product.

CAPSYS|CAPTURE

KEY FEATURES

- ✓ Thin Capture Client (Requires minimal training, easy to deploy and maintain, from anywhere!)
- ✓ Production scanning of virtually any volume of documents, distributed or centralized
- ✓ Capture documents from a variety of sources (scanned paper, faxes, Emails, multi-function devices, electronically created documents and more...)
- ✓ Automated document cleanup (image enhancement – de-skew, de-speckle, border removal and blank page deletion)
- ✓ Visual Capture Process Designer (No coding required! You define your business rules and automate decisions)
- ✓ Thumbnail Document Classification Mode
- ✓ Bar Code Recognition
- ✓ Machine Printed Character Recognition (OCR)
- ✓ Hand Printed Character Recognition (ICR)
- ✓ Forms Recognition
- ✓ Database Lookup and Query Tools
- ✓ Standard and Searchable .PDF Creation
- ✓ Field Input Masks and Validation
- ✓ Group Administration/Active Directory User Integration

CAPSYS CAPTURE ACCESSORY MODULES

	<p>CAPSYS CAPTURE DOCUMENT IMPORT MODULE™ CAPSYS CAPTURE Document Import is a Quick Server eXtension (QSX) that allows image and other office documents to be imported into CAPSYS CAPTURE in an automated fashion.</p>
	<p>CAPSYS CAPTURE FAX IMPORT MODULE™ CAPSYS CAPTURE Fax Import is a Quick Server eXtension (QSX) that monitors incoming faxes from a supported fax server and automatically imports faxes into CAPSYS CAPTURE for processing based on provided business rules. CAPSYS CAPTURE supports both the Biscom® FAXCOM™ and Open-Text® Captaris® RightFax™ solutions.</p>
	<p>CAPSYS CAPTURE EMAIL IMPORT MODULE™ The CAPSYS CAPTURE Email Import monitors POP3 and IMAP mailboxes for incoming mail and imports message text and attachments into CAPSYS CAPTURE for processing.</p>
	<p>CAPSYS CAPTURE OPEX IMPORT MODULE™ The CAPSYS CAPTURE Opex Import is a Quick Server eXtension (QSX) that allows the Opex® AS 3600i Automated Extraction Desk to be used as a front-end capture device for CAPSYS CAPTURE in large mailroom processing environments. Opex's AS3600i is a high-speed color scanner equipped with a unique drop feeder, which operates as part of an Opex Rapid Extraction Desk for quick and easy mail handling. Designed to provide image capture for a variety of mail, the AS3600i processes clean payments, exception mail and full-sized documents. This system eliminates the time and labor required to batch, prep and scan, offering additional cost saving advantages.</p>

	<p>CAPSYS CAPTURE TRANSACTION MATCH™ CAPSYS CAPTURE Transaction Match is a Quick Server eXtension (QSX) that matches incoming documents based on unique transaction criteria. CAPSYS CAPTURE will hold documents in a queue until all related transactional documents have been received, then release them to the next step in the workflow process.</p>
	<p>CAPSYS CAPTURE SEARCHABLE .PDF™ The CAPSYS CAPTURE Searchable .PDF is a Quick Server eXtension (QSX) that converts .TIFF documents into searchable .PDF documents with or without bookmarks using an embedded full-page OCR engine. CAPSYS CAPTURE can also convert scanned images into standard .PDF files.</p>

CAPSYS CAPTURE DOCUMENT PROCESSING MODULES

	<p>CAPSYS CAPTURE IMAGE CLEANUP™ CAPSYS CAPTURE Image Cleanup is a Quick Server eXtension (QSX) that provides image enhancement and cleanup capabilities for incoming images, including de-skew, de-speckle, border removal and blank page deletion.</p>
	<p>CAPSYS CAPTURE BARCODE/PAGE SEPARATION™ CAPSYS CAPTURE Barcode is a Quick Server eXtension (QSX) that provides comprehensive barcode and patch code recognition and document separation capabilities for CAPSYS CAPTURE.</p>
<p>ABCDEF</p>	<p>CAPSYS CAPTURE OCR™ CAPSYS CAPTURE OCR provides optical character recognition (OCR) and document processing modules including Optical Character Recognition (OCR), Intelligent Character Recognition (ICR), and Optical Mark Recognition (OMR).</p>
	<p>CAPSYS CAPTURE DOCUMENT CLASSIFY™ CAPSYS CAPTURE Document Classify is a Quick Server eXtension (QSX) that automatically recognizes documents and forms by document type based on the characteristics of the form.</p>

CAPSYS CAPTURE RELEASE MODULES

With CAPSYS CAPTURE Release Modules, processed documents and their associated data is easily delivered into a variety of industry leading document management systems, such as Microsoft® Sharepoint™, Oracle® IPM, EMC® Documentum®, Hyland OnBase®, FileBound®, IBM® FileNET® P8, KnowledgeTree™ and many others. Whatever your repository, you can use CAPSYS CAPTURE as the document capture solution of choice.

CAPSYS CAPTURE ONLINE - SOFTWARE AS A SERVICE ("SaaS")

As CAPSYS CAPTURE was the first fully Web-based, fully-featured document capture solution designed for the internet, it is naturally available as a Software as a Service ("SaaS"). SaaS is a model of software deployment where an application is licensed for use as a service and provided to customers on demand. Through this model, CAPSYS CAPTURE ONLINE is a subscription service that is updated regularly through the internet. CAPSYS CAPTURE ONLINE offers numerous time and cost-saving advantages over on-premises document capture management software systems while providing much greater adaptability, allowing the user to evolve, scale and refine the system as needs change.

CAPSYS CAPTURE ONLINE offers many advantages over installing and maintaining on-premise document capture management systems:

- ✓ No huge upfront cost
- ✓ No large capital expenditures required
- ✓ No server/client hardware/software to purchase
- ✓ No software to install, upgrade or update
- ✓ No need to resource IT staff (including a System Administrator!)
- ✓ No worries about downtime, backups, or recovery (we take care of all of this for you!)

You're up and operational in just days, not weeks or months...Just log into your browser and you're capturing documents wherever you want, anytime you want – regardless of your content repository – CAPSYS CAPTURE can support them all.

SYSTEM REQUIREMENTS:

CAPSYS CAPTURE WEB CLIENT

- ▲ Windows XP Home/Professional, Windows Vista Home/Business/Ultimate, Windows 7
- ▲ Microsoft Internet Explorer 6.0 or higher
- ▲ Pentium class PC (1 GHz or higher recommended)
- ▲ 512 megabytes of RAM or more (1 gigabyte of RAM or more for Windows Vista or Windows 7)
- ▲ Designed for XGA resolution at 1280 x 1024 or higher

CAPSYS CAPTURE SERVER

- ▲ Windows XP Professional, Windows Vista Business 32/64-bit, Windows Server 2003 32/64-bit, Windows Server 2008 32/64-bit
- ▲ Pentium Class PC (2 GHz dual-core, dual processor or higher recommended)
- ▲ 1 GB RAM for Windows XP, 2 GB RAM or more for Windows Vista, Windows 7, Server 2003 and 2008
- ▲ 500 megabytes of disk space for application and supporting files (storage capacity for documents may vary and would be additional)
- ▲ Microsoft SQL Server 2005 or 2008
- ▲ Microsoft Internet Information Server (IIS) 5.0 or higher

ABOUT CAPSYS

CAPSYS® is a leading developer of Web-based, distributed document capture and capture process management software. CAPSYS provides affordable, easy-to-deploy document capture solutions in a completely Web-based environment through its national network of channel partners. The company's flagship product, CAPSYS CAPTURE, can easily and efficiently capture documents for organizations of any size from anywhere at any time around the world. CAPSYS' solutions are offered both as Software as a Service ("SaaS"), hosted in the convenience of our secure data center, or as a traditional "on-premise" purchase. To learn more, call 877-322-7797 or visit www.capsystech.com.

CAPSYS CAPTURE fully supports the TWAIN standard for image acquisition devices. For more information, please visit www.twain.org.
